

Company Fact Sheet

Overview

NuCO₂ beverage carbonation solutions combine continuous, unprompted beverage gas supply with equipment for storage, blending and dispensing to customer locations. Our equipment and gas supply solutions are designed to ensure uninterrupted, safe fountain and draught beer beverage carbonation.

Services

NuCO₂ is the only national provider of Certified ISBT & CGA QVL I beverage-grade carbon dioxide, the highest quality, safest carbon dioxide available. NuCO₂'s draught beer-grade nitrogen gas and blending solutions assure zero waste for our customers and great taste for their consumers.

The Company provides the most reliable and convenient beverage carbonation solutions to more than 170,000 customers, including the top 100 national restaurant chains, convenience stores, theme parks and sports/entertainment venues.

Locations

Founded in 1995, NuCO₂ is headquartered in Stuart, FL. NuCO₂ has more than 1,075 employees nationwide, including field operations staff comprised of drivers and technicians, at over 160 locations throughout the United States.
